

## **Fibronectin-functionalised synthetic peptide hydrogel bioink**

Cat. No. HG021

Lot. No. (See product label)

### **Product Description**

Fibronectin-functionalised synthetic peptide hydrogel bioink that forms a nanofibrous network, mimicking the extracellular matrix. This bioink is biocompatible and has been designed to provide versatility to support different printing applications as the mechanical and chemical properties can be adapted.

### **Application**

It has been specifically developed for Bioprinting and advanced 3D Cell Culture applications.

**FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY**
