

Nano Cellulose/Graphene Composite Aerogel

Cat. No. NAT-1514

Lot. No. (See product label)

Product Name	Nano Cellulose/Graphene Composite Aerogel
Common Name	Nano Cellulose/Graphene Composite Aerogel
Synonyms	Nano Cellulose/Graphene Composite Aerogel
Product overview	This product is manufactured by gel freeze-drying method. The product has excellent adsorption performance, biocompatibility, and electrical conductivity.
Size	Diameter: 20mm Thickness: 2mm
Storage	Store at 4°C.
Application	Energy storage, catalysis, analytical chemistry, mechanics, adsorption, biology, microelectronics, sensors, etc.
