

Hydroxyapatite (HAp) Powder, Rod-shaped, 20nm

Cat. No. CER-0004

Lot. No. (See product label)

Cat.No	CER-0004
Product Name	Hydroxyapatite (HAp) Powder, Rod-shaped, 20nm
Common Name	Hydroxyapatite (HAp) Powder, Rod-shaped, 20nm
Synonyms	Hydroxyapatite (HAp) Powder, Rod-shaped, 20nm
Description	Hydroxyapatite (HA) is a widely used ceramic material in orthopedic applications due to its excellent biocompatibility and osteoconductivity. It closely resembles the mineral component of natural bone, which makes it an ideal material for bone tissue regeneration and repair.
Product overview	This product is manufactured under ISO13485:2016. It can be used in orthopedic use.
Morphology & Appearance	White Powder
Size	20nm wide and 150nm long
Purity	>99%
CAS Number	1306-06-5
Storage	Store at room temperature
Application	Bone cement, bone particles, bone coating, tableting, desensitizing agent
