| <b>Description</b>                 | This product is a pure water-based antistatic slurry developed by our company for PVC film and mine air duct cloth. Because water is used as the dissolution carrier, this product has environmental protection characteristics such as no irritating smell, safety, non-toxicity, non-flammability, non-explosion, etc. This product has good printability, excellent adhesion, water resistance, electrical resistance on PVC film Low, high gloss, etc., and it still has good printing performance for PVC films with plasticizer precipitation. At the same time, the product has excellent anti-blocking and heat-sealing properties for the hair dryer cloth. |
| <b>Morphology &amp; Appearance</b> | Black liquid                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Size</b>                        | $\leq 10\mu\text{m}$                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Storage</b>                     | Store at room Temperature. It contains organic solvents, keep well ventilated, avoid inhalation of excess vapor into the body, if it comes into contact with the skin, it should be cleaned with alcohol and hand sanitizer in time                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Application</b>                 | 1. Anti-static coating                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
