

Silicon-carbon Composite Powder for Lithium Ion Battery Anode

Cat. No. BMLC-KJ020

Lot. No. (See product label)

Product Name	Silicon-carbon Composite Powder for Lithium Ion Battery Anode
Common Name	Silicon-carbon Composite Powder for Lithium Ion Battery Anode
Synonyms	Silicon-carbon Composite Powder for Lithium Ion Battery Anode
Product overview	The product has excellent characteristics such as high capacity and high first efficiency in lithium battery applications, and is especially suitable for cylindrical lithium batteries.
Morphology & Appearance	Powder
Size	D50: ~10.4μm
Storage	Store at room temperature
