

Featured Hydroxyapatite Product for Your Project

Advantage:

- ✓ Chemical similarities with the natural bone
- ✓ Biocompatibility
- ✓ Bioactivity
- ✓ Osteointegration
- ✓ Bioaffinity
- ✓ Osteoconduction
- ✓ Osteoinduction

Matexcel provides materials and services for worldwide researchers in academia and industry. We have hydroxyapatites (HAp) in different dimensions (nano to micro) and grades (research, medical, and food grades). Due to its similarity in size, crystallography, and chemical composition with human hard tissue, HAp is one of the most widely studied materials for orthopedic and dental implants.

Our Featured Product:

Cat.No.	Product Name	Particle Size	Application
CER-0001	Hydroxyapatite(acicular) Powder	60 nm	Food and toothpaste additive
CER-0053	Hydroxyapatite Disc	Disc	Bone related research fields
